

Travel Booking Made Simple

Concur Cliqbook Travel's user interface delivers a familiar consumer travel booking experience, offering end users powerful yet easy-to-use features, all while ensuring your corporate policies are being enforced. Visual enhancements including an intuitive map-based interface for point and click air booking, grids to display fares organized by your preferences and property photographs make booking travel effortless. Concur Cliqbook Travel enables travelers to book air, rental car, hotel, and rail reservations quickly and easily. With minimal effort and an intuitive user interface, travelers can rapidly book the most complex of trips with a few clicks. Trip templates, maps, smart reminders, and integration to PDA devices are just a few examples of how Concur Cliqbook Travel increases employee productivity by accomplishing the travel booking task quickly. And of course, there are also multi-language capabilities, catering to international travelers and staff.

Managing Travel Spend Through Policy Compliance

Cliqbook helps to ensure spend is within the guidelines of your T&E policy and is booked with your preferred vendors. Audit rules pre-built into the solution enforce your policies and create a sense of visual guilt for your business travelers – guiding them to make travel decisions that are in the best interest of your organization, while still convenient for them. This allows your travelers to spend smart and your company to pay travel vendors smart. By delivering a positive experience for travelers, Cliqbook reinforces user behavior and increases adoption, reducing program leakage and decreasing the reliance on travel agent-assisted reservations. The result is a significant reduction in travel booking transaction fees. Furthermore, Cliqbook provides powerful reporting data to facilitate pricing negotiations with vendors allowing you to get the best possible rates for your organization. Enabling your travelers to make smart travel choices is key to controlling travel costs. Cliqbook employs the most advanced fare search capabilities to deliver the lowest cost possible choices for your travelers. By delivering the lowest fares and travel choices based on your corporate policy and your business travelers' personal preferences, Concur eliminates the guess work and drives online tool adoption.

Using Cliqbook, organizations can prevent out-of-policy purchases before they occur while simultaneously communicating corporate policy (including updates) to all travelers. Robust business rules combine with automated pre-trip approval to ensure consistent travel policy enforcement.

Single Travel Site for All Employees

- Provides all travelers with the ease of using the same site. This is especially helpful when employees are transferred to international offices; administrators don't have to create new logins and travelers are able to continue using the same login used prior to their move.
- Delivers consolidated reporting for your entire organization instead of having multiple reporting sites.
- Enables flexible support for approvals is an added benefit to having a single global travel booking site for your organization. This allows a manager based out of one country or location to approve a traveler in another.

Investment

Cliqbook offers added features and benefits that surpass other online booking tools. With the added features and benefits of Cliqbook comes an initial investment to get your company started. It is recommended that clients with an online booking commitment of **at least 25 online transactions per month** would benefit the most from Cliqbook.

Burkhalter Travel charges NO MONTHLY FEE for using Cliqbook.

You just pay a fee per-transaction.
