

American Chiropractic Clinic

Thank You!

Thank you for sharing the story of your experience in our clinic. We have found that patients new to our office benefit greatly by reading what our current patients say about us. In fact most of our patients come from a direct referral from an established patient like you.

Do You Need Some Help?

Just write your story in your own words on the next page. Write as much or as little as you like. All your comments will be greatly appreciated.

If you have trouble getting started, you might think about the following ideas:

- How much trouble did you have before you came to see us? How was your life affected by your problem? Had you tried other doctors or treatments without success?
- How did our treatment help you? How comfortable were your treatments? How quickly did you improve and how much?
- How is your life changed as a result of your treatment? What have you been able to do that you previously could not?
- How much did you like our doctors, our staff, and our facility? How well did we explain things? How compassionate, supportive and caring were we? How clean, comfortable, comprehensive and state-of-the-art was our facility and equipment?
 - How strongly would you recommend us to others, and why?

We Need Your Permission.

We need your permission to share your:

- **Story**
- **Name**
- **Picture**

When you're done writing your story, we have one of those legal forms for you to sign. With that form you'll tell us exactly how we can share your story, and whether we can share your name and picture as well.
