Iceland!

A select group of intrepid travelers intentionally limited in numbers so as to assure only the highest levels of personal service and attention to details will be experiencing one of the most unusual and rewarding countries to visit in the World as part of our select 2019 FEATURE personally escorted tour experiences. As a travel bonus, we have selected the best time of year when we can add an adventure experienced only by a few as we engage in a quest as together we search for the famous and sometimes hard-to-find Northern Lights!

What are the Northern Lights?

The bright dancing lights of the aurora are actually collisions between electrically charged particles from the sun that enter the earth's atmosphere. The lights are seen above the magnetic poles of the northern and southern hemispheres. They are known as 'Aurora borealis' in the north and 'Aurora australis' in the south. Auroral displays appear in many colours although pale green and pink are the most common. Shades of red, yellow, green, blue, and violet have been reported. The lights appear in many forms from patches or scattered clouds of light to streamers, arcs, rippling curtains or shooting rays that light up the sky with an eerie glow.

Why is this a “quest?”

Known as the “land of fire and ice,” Iceland is truly a place of many wonders. This experience will take you on a search for the once-in-a-lifetime experience of viewing the spectacular Northern Lights on a nighttime cruise; and in numerous other ways, as well. Statistically, we are going at the best time of year for this. You will travel to the “Golden Circle,” home to many of Iceland's most renowned natural wonders. You will spend time at Thingvellir National Park, the nation's most historic area. You will gaze at the spectacular Gullfoss Waterfall - one of the world's most incredible cascades. At Eyjafjallajökull Volcano Visitor Center you will learn about the dramatic 2010 volcanic explosion. You will see traditional turf-built house, walk on a black volcanic sand beach, see Jokulsarlon glacial lagoon filled with floating icebergs, and relax in the warm and mineral-rich water of the natural geothermal pool, the Blue Lagoon.
