

# Now is the Time to Travel “plus” Why You Should Always Reserve Early

There has never been a better -- or probably safer -- time to travel. Plan now to reward yourself and your loved ones with the most wonderful experience of all -- travel! The reasons for doing this now, more than ever, are many. Among them are:

- ◆ **It's the “American” thing to do!** As a country, we are in a fight. You -- and I -- have but two choices -- to win, or to lose. The best way to help our country win is to continue to live our lives in a normal manner -- not overreacting to fear. To be concerned with the economy and military involvements is certainly appropriate, but to become introverted and immobile with fear means we have lost -- and others have won. Now is the time to continue to help ourselves and our country by going forward. There's a great world out there just waiting to be explored and enjoyed. Everybody smiles in the same language. Visit America - and visit the rest of the world. There's absolutely nothing that will add as much knowledge about, and appreciation of, so many things as does travel.
- ◆ **Your biological clock is running!** It's a fact. Today's aches and pains become tomorrow's incapacities. Each year we see a number a persons who are no longer physically able to do the things that were formerly routine. To put off today what you want to accomplish in the hopes of doing it tomorrow very often does not work out. Destinations, too, change, making them less desirable to visit.
- ◆ **Travel security is the best our nation has ever had!** If you want to feel good -- and reassured -- all you need do is to travel through an airport and its security system. Greater numbers of security personnel are performing the most thorough examinations ever. It's very comforting to see flight crews themselves being thoroughly checked as they board airplanes. Is it perfect? No! Never has been. Never will be. However, it is a fact that more persons will die in the United States this year from the common flu bug than from acts of terrorism. More persons will be injured in their own homes than elsewhere. Take a flu shot -- and travel.
- ◆ **Planes and cruise ships are traveling nearly full!** Leisure travelers are filling airplanes and cruise ships. Try to get a last minute seat on either a plane or a ship and your chances are really not good at all. Leisure travel continues to be robust, and advance planning and reservations are certainly in your best interests if you want to save money, get the best schedules, etc. With “quality” travel offerings deals are by far better when you reserve early. Last-minute fire sales are regularly of poor quality, and generally very undesirable.
- ◆ **Cruise lines, tour operators and hotels are enforcing “recall” dates!** All of these providers of travel are getting much more efficient in their operations. They are strictly recalling unsold spaces held by promoters, etc. so they can be sold elsewhere. Because of the demand described above, they know if the spaces are not selling one place they will certainly sell in another venue. The end result of all this is that if you want to have the best selections of accommodations, best selections as to prices, best selections as to meal times, best selections as to itineraries, etc. you need to pay your “refundable” deposits to secure your spaces early. If you don't, you “may” still be able to secure spaces, but most often with less desirable pricing, accommodations, schedules, etc. You have everything to gain -- nothing to lose -- when you act “now”.
- ◆ **You can travel FREE!** Simply organize a small group of your friends -- family -- club members -- church organization members, etc. and your next tour or cruise can be FREE when you work with Please Go Away™ Vacations. This can be true with as few as 9 other persons. Let our “special groups” department explain this to you. We'll support you with proven promotional success programs and methods developed over the past 50 years of “hands on” experiences. Contact us for a “no obligation” conference.
